guidelines

June 2022
The ambition of the European Open Science Cloud (EOSC) is to develop a “Web of FAIR Data and services” for science in Europe. EOSC will be a multi-disciplinary environment where researchers can publish, find and re-use data, tools and services, enabling them to better conduct their work.

EOSC builds on existing infrastructure and services supported by the EC, Member States and research communities. It brings these together in a federated ‘system of systems’ approach, adding value by aggregating content and enabling services to be used together.

This environment will operate under well-defined conditions to ensure trust and safeguard the public interest. Expectations of service providers and users will be made explicit to ensure appropriate behaviour.

The EOSC is recognised by the Council of the European Union among the 20 actions of the policy agenda 2022-2024 of the European Research Area (ERA) with the specific objective to deepen open science practices in Europe. It is also recognised as the “science, research and innovation data space” which will be fully articulated with the other sectoral data spaces defined in the European strategy for data. Full deployment of the EOSC will lead to higher research productivity, new insights and innovations, as well as improved reproducibility and trust in science.

The implementation of the EOSC is based on a long-term process of alignment and coordination pursued by the Commission since 2015 with the many and diverse stakeholders of the European research landscape. The current phase of implementation (2021-2030), is taking place in the context of the EOSC European co-programmed partnership launched at the Research and Innovation Days 2021 and according to a Strategic Research and Innovation Agenda (SRIA) which is co-developed with the entire EOSC community.
The EOSC Association

The nerve centre of the implementation of the European Open Science Cloud

The EOSC Association (EOSC-A) is the legal entity established to govern the European Open Science Cloud (EOSC). The Association membership – more than 240 Members and Observers representing the breadth of the stakeholder community from across Europe – is jointly responsible for delivering the objectives agreed in the Memorandum of Understanding signed by the European Union and EOSC Association to form the official Partnership. In this role, EOSC-A serves as the nerve centre for the implementation of the European Open Science Cloud.
Strong collaboration on national level

The EOSC Tripartite Collaboration is a concept of strategic coordination between the EU represented by the European Commission, the participating countries represented in the EOSC Steering Board, and the research community represented by the EOSC Association to resource and support the implementation of the EOSC ecosystem in Europe.

This Tripartite Collaboration will ensure dialogue and strategic coordination towards achieving the EOSC policy objectives.
Why a new logo?

The old logo was perfect to launch the EOSC initiative in 2018, when it was important to make the scientific community familiar with the meaning of the EOSC acronym “European Open Science Cloud.”

With the set-up of the EOSC Association and the establishment of the co-programmed Horizon Europe EOSC Partnership, EOSC has found its centre of gravity. It enables the leveraging of the one billion Euro investment of the EOSC Partnerships by establishing a powerful brand that is used by all beneficiaries receiving funding in the framework of Horizon Europe INFRAEOSC projects.

The new EOSC logo is the result of a pan-European competition aiming at design students from across Europe. Following a community vote Joe Parker-Rees and his proposal of a fresh image “emphasizing flow, movement and innovation” are the clear winners of a field of competitors from over 30 countries.

You can download the new logo [here](#). 

Logo co-branding guidelines
Intellectual Property and Usage of the EOSC Logo

The new EOSC is the exclusive property of the European Open Science Cloud Association AISBL (EOSC-A) with Reg.-No. 0755 723 931, located in 1050 Brussels.

EOSC-A will develop detailed instructions for the usage of the logo outside the framework of the co-programmed Horizon Europe EOSC Partnership.

The co-branding guidelines, which are presented in the following are exclusively for projects funded under the INFRAEOSC destination of the co-programmed Horizon Europe EOSC Partnership. They will be an integral part of the “EOSC Vademecum”, which frames the alignment activities between the EOSC Partnership and the INFRAEOSC projects. The common branding will establish a robust, common brand used to promote all Partnership activities contributing to the implementation of EOSC.
Not sure?

Should you run into any difficulties or do you wish to receive feedback on the co-branded EOSC logo you created, don't hesitate to contact EOSC at logo@eosc.eu
The co-branded logo

The co-branded EOSC logo consists of the main EOSC logo joined by the name of a specific EOSC project. This can be added both horizontally and vertically. Here below you’ll find some examples:
Adding your project

The way the co-branded logo is constructed is subject to certain requirements. It is recommended that the name of your EOSC project be placed on the right side (horizontal version) or under (vertical version) the main EOSC logo. Please take into account the measurements of the open spaces to both sides of the central dividing line, as illustrated in the technical schemes below. To ensure a coherent 'EOSC family' brand image it is advised to use text only and no individual project logos. Clearspaces remain the same with Project Names preceding the EOSC logo.

**horizontal**

![Horizontal co-branding](image)

Top element of the EOSC symbol defines clearspace

**vertical**

![Vertical co-branding](image)

Top element of the EOSC symbol, turned 90°, defines clearspace

Project cap height is identical to EOSC logo height
Adding the EU emblem

All beneficiaries, managing authorities and implementing partners of EU funding must use the EU emblem in their communication to acknowledge the support received under EU programmes and contribute to the visibility of the EU on the ground. The minimum height of the EU emblem, which you can download here, must always be 1 cm.

EOSC 'O' defines clearspace
Typeface

Roboto Regular

The Roboto Regular typeface, designed by Christian Robertson, has a natural reading rhythm and features friendly and open curves which perfectly match the inclusiveness of the main EOSC logo. It also guarantees a good readability of the names of the various EOSC projects.

You can download Roboto Regular [here](#).
Main colours

The two official brand colours present in the EOSC logo are mild pink combined with lively esmerald.

Pink
RGB 255/92/128
CMYK 0/76/27/0
#ff5b7f

Green
RGB 0/134/145
CMYK 90/0/33/25
#008792
Alternative colours

To ensure maximum visibility of the new EOSC logo it is recommended to use the main brand colours at page 5 also for your co-branded logo. However, should you feel other colours are more appropriate for your project you might want to consider using the alternative colour combinations below. If you prefer a different set of colours altogether, please contact logo@eosc.eu

Orange
RGB 238/116/68
CMYK 0/65/75/0
#ee7444

Purple
RGB 115/91/163
CMYK 65/70/0/0
#735ba3

Green
RGB 118/184/42
CMYK 60/0/100/0
